Spanning from the dawn of science in ancient Greece to the frontiers of modern research, this book explores the ideas and innovations that have shaped our understanding of the world.

Featuring 250 milestones in the history of science, the book covers a wide range of topics, including:

- The development of the scientific method
- The discovery of the laws of motion and gravity

- The development of the theory of evolution
- The discovery of the atom
- The development of the theory of relativity
- The discovery of dark energy

Each milestone is described in detail, with clear explanations of the scientific principles involved. The book also includes timelines, diagrams, and illustrations to help readers understand the complex concepts.

From Darwin to Dark Energy: 250 Milestones in the History of Science

is an essential resource for anyone interested in the history of science. It is a fascinating and comprehensive look at the ideas and innovations that have shaped our understanding of the world.

Table of Contents

1. The Scientific Revolution
2. The Enlightenment
3. The Nineteenth Century
4. The Twentieth Century
5. The Twenty-First Century

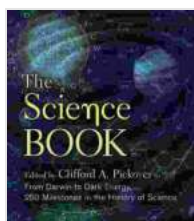

Reviews

"From Darwin to Dark Energy: 250 Milestones in the History of Science is a masterful work of scholarship. It is a must-read for anyone interested in the history of science." - Steven Weinberg, Nobel laureate in physics

"From Darwin to Dark Energy: 250 Milestones in the History of Science is a fascinating and comprehensive look at the most important scientific discoveries of all time. It is a valuable resource for anyone interested in the history of science." - Bill Nye, science educator
