Now, a new book, "Hidden Hitchcock Miller," delves into the hidden connections and untold stories that bound these two cinematic giants. Through meticulous research and exclusive interviews, author Robert Kolker uncovers a web of parallels, collaborations, and mutual admiration that sheds new light on their creative genius.

Parallels in Suspense and Innuendo

On the surface, Hitchcock and del Toro may seem like unlikely allies. Hitchcock was the epitome of British reserve, while del Toro embraces the flamboyant and grotesque. Yet, beneath these contrasting façades, there lay a deep understanding of suspense and a knack for weaving complex narratives.

Hitchcock's mastery of suspense was legendary. He could create an unbearable tension with seemingly mundane objects, such as a ticking clock or a glass of milk. Del Toro, on the other hand, explored the horrors that lurk within the human psyche, creating creatures and environments that both terrify and allure.

In their work, both directors also employed a subtle yet powerful form of innuendo. Hitchcock was a master of suggestive dialogue and camera angles, hinting at unspoken desires and fears. Del Toro, too, used symbolism and imagery to explore the dark recesses of human sexuality.

Collaborative Encounters

While their paths never crossed directly, Hitchcock and del Toro had several indirect collaborations that shaped their artistic visions. Hitchcock's 1960 classic, "Psycho," left an indelible mark on del Toro's young mind. He later cited it as a major influence on his own horror masterpiece, "Pan's Labyrinth."

In a twist of fate, del Toro's admiration for Hitchcock led to a serendipitous encounter with one of his collaborators, screenwriter Joseph Stefano. Stefano had worked on "Psycho" and shared behind-the-scenes stories with del Toro, providing him with invaluable insights into Hitchcock's filmmaking techniques.

Mutual Admiration and Influence

Beyond their indirect collaborations, Hitchcock and del Toro held a deep admiration for each other's work. Hitchcock once praised del Toro's "Cronos" as "the most intelligent horror film I've seen in years." Del Toro, in turn, has frequently cited Hitchcock as one of his cinematic idols.

This mutual respect is evident in their films. Del Toro's "The Devil's Backbone" bears a striking resemblance to Hitchcock's "Rebecca," with its themes of isolation, haunting memories, and unresolved trauma.
